Adventure travel app for android

Tom's Guide is supported by his audience. When you buy through links on our website, we can earn an affiliate commission. Get more See more Travel to remote locations or to enchanted countries is a breathtaking experience. But with each new experience comes some problems. You can get directions that take you to the wrong places, or you can struggle with the language barrier. If you're tired of walking around big cities, asking for directions or performing a map, then we're happy to let you know that you can remove all these things just using your Android smartphone. Google Play Store is literally flooded with travel apps, from maps to language translators, everything is already prepared for you. But before you leave your house for another adventure, be sure to check out the apps below to make travel fun and fun for you and your family. Tripti Tripti is an interesting travel program that helps you manage all your travel needs by acting like one of the old-fashioned travel agencies. Acting on your own, Tripti doesn't matter. But when you sign up for a Tripti account, all your travel needs are mashed up and rolled into a handy little application. Tripti works by automatically scraping all your Gmail information, cleaning it up, and tracking your travel life. You can use the app to check in on your flights, check your flight status, map the travel distance from your hotel, and more. There's also the Premium Tripti app that adds a variety of neat features for you to tinker with. The app is very convenient and is a great alternative to carry maps and travel guides. Tripti - Travel Organizer for Android on AppBrainKayakAAA When it comes to getting the cheapest flights, nothing comes close to Kayak application for Android. Travelers who are scouring for the cheapest flights can make their lives easier. The biggest selling point for Kayak must be its customisation when you search for your next flight. Users can find seeing Kayak's check boxes and buttons a little overwhelming. But once you get the hang of it, these extra options might just save you time searching. Kayak also offers flight statuses, manages your itinerary, posts baggage fees, and gives you access to airline numbers and information. For those of you who are always looking for cheap flights so Kayak can narrow your search and trim it down to only the best finds. Flight Hotel Car Search for Android on AppBrainGoogle GogglesN when it comes to traveling abroad, Google Goggles comes in handy for just about everything. From identifying foreign brands, to breaking the language barrier, Google's app is like the king of all modern translators. If you have done a lot of travel, then the language barrier will arguably be the most common problem for tourists. Non-English speaking countries can be quite difficult for tourists to communicate in, stumble using a foreign language. Fortunately, Google Goggles lets travelers decipher just about anything. There are many ways to use Google Goggles. Snap an image, scan barcodes to get product information, scan QR codes to extract information or even solve Sudoku puzzles. Google Goggles for Android on AppBrainWikitudeDo you want to see the world in a different perspective? If you've already downloaded Google Sky Map, you've pretty much got the idea of Wikitude. See the world with different eyes using your phone's camera, and let Wikitude explore everything for you. Wikitude is an augmented reality global travel guide that covers all Wikipedia entries and user-contributed content and posts them on your phone's camera view. Thus, it gives you detailed information about your surroundings. Wikitude uses your phone's GPS function, compass, and motion sensors to pinpoint your location to the landmarks found in your surroundings. The app is useful as a great tourist guide, but can also be used to dig up some information about historical events or places near you. Wikitude World Browser for Android on AppBrainHotels Near MeThe most problem with travelers arriving at their destination should be finding the right place to stay. Fortunately, an application known as Hotels Near Me is definitely useful. The app tracks all the best hotels nearby. With Hotels Near Me's huge database storing over 60,000 hotels, finding a place to stay in a foreign country will be a thing of the past. Travelers are treated with a number of useful details, such as a star rating for each hotel, an address, the hotel phone number and user reviews. Once you've chosen a hotel, the app will automatically show you photos of rooms, a nice little gallery of the place, and a price quote. If you are satisfied, you can book the hotel room of your choice directly from your phone. You will also get an email confirmation of your chosen choice. Hotel Near Me also allows you to browse hotels in advance, so you don't have to worry about it when you arrive at your destination. Simply select the other places option and input the desired city of your choice. Hotels near me for Android on AppBrainWhereWhereWhereWhereWhen you travel to remote locations, nothing beats having a GPS tracker on your phone to pinpoint exactly things you might be interested in. Getting real time information will never be the same again. Along with the phone's GPS, users can receive up-to-date information about almost anything under the sun. From cheap gas, to weather forecasts, moving screenings, recommended restaurants, news headlines and even traffic conditions, Where has mapped everything just for you. The app also allows you to browse yellow pages found at the Yelp library, and it can even find the nearest coffee shop for you. WHERE for Android on AppBrainTrip JournalA other fascinating program that uses the phone's is Trip Journal. Basically, Trip Journal tracks down your exact itinerary monitor your GPS coordinates. Along with the photos you took during your trip, Trip Journal makes an artistic sketch day with the photo and a map next to it. The app also lets you place markers and add notes while collecting statistics about the distance you've traveled. UI at Trip Journal is not your average run of the mill, but rather it is very slim and artistic to use as if you are actually holding a journal. When you're home from your trip, you can export your routes via Google Earth format and share them with your friends and family. You can also upload your photos easily in either Facebook or Picasa. The app also allows you to archive your travels for future use. If you are a private type of person, then you might want to go to the free lite version of Travel Journal.Trip Journal Lite for Android on AppBrainFXware Currency GuideHaving problems with exchange rates? So look no further than the FXware Currency Guide. The app is a must-have for users who are constantly traveling abroad to different countries.
